

LC 1503 - ANODIZED ALUMINUM TOP POST

Features:

Top post composed of $\varnothing 76-61$ mm aluminum tube for attachment to the pole. The $\varnothing 42$ mm curved support is joined to the tube. Main tube with 2 aluminum collars. Aluminum decorative motif. Light fixture attachment with $\varnothing 42$ mm threaded hole. Stainless steel hardware.

Anodizing

The anodizing process consists of the formation of the oxide layer on the metal surface by means of electrochemical method. Anodizing not only durably protects the pole from external factors, but also provides an option to color the aluminum 10 colors, each with the option of brightening.
