

## LC 1501 - ANODIZED ALUMINUM TOP POST

### Features:

Top post composed of  $\varnothing 76-61$  mm aluminum tube for coupling to the pole. The  $\varnothing 42$  mm curved support is joined to the main tube with 2 aluminum collars. Lighting fixture attachment with  $\varnothing 60$  mm threaded hole. Straight aluminum tie rod. Stainless steel hardware.

### Anodizing

The anodizing process consists of the formation of the oxide layer on the metal surface by means of electrochemical method. Anodizing not only durably protects the pole from external factors, but also provides an option to color the aluminum 10 colors, each with the option of brightening.
